Summary

B.Tech Electronics and Telecommunication Engineering student in Bhubaneswar with hands on experience building full stack web applications and AI enabled solutions. Skilled in JavaScript, Python, React, Node.js, and technical problem solving; eager to apply AI assisted productivity, documentation, testing, and coordination skills to live EdTech projects.

Experience

AI/ML Intern Bhubaneswar, Odisha
Central Tool Room and Training Centre (CTTC)

- Applied Python and machine learning techniques for data processing, model development, and evaluation.
- Gained practical experience with AI/ML workflows through development, experimentation, testing, and structured problem-solving.

Projects

macOS-Inspired Portfolio Website | *React.js*

- Built an interactive macOS style portfolio using React.js, managing draggable and resizable application windows through component state.
- Created GitHub, Notes, Resume, Spotify, and Terminal views; linked Calendar, Mail, and LinkedIn to their respective external services.
- Implemented a command-based terminal interface that lets visitors search and learn about skills, education, hackathons, and projects.

ShopKart E-Commerce Website | *React.js*

- Built a React based e-commerce website with product browsing, category based filtering, cart management, address entry, and Buy Now flow.
- Designed responsive user interfaces for a clear product discovery and purchase experience.

Apple Website UI Clone | *HTML, CSS*

- Recreated the visual interface of an Apple website using HTML and CSS, focusing on layout, styling, and responsive UI design.

Skills

Web Development: HTML, CSS, JavaScript, React.js, Tailwind CSS, Node.js, Express.js, REST APIs, EJS
Programming: JavaScript, Python, C
AI & Automation: AI/ML Workflows, AI Chatbot Integration, Prompt-Based Productivity
Documentation & Collaboration: Technical Documentation, Code Documentation, Git, GitHub, Project Coordination
Database & Authentication: MongoDB, JWT, Authentication & Authorization
Tools: VS Code, Postman, npm, Vite, Axios, LaTeX

Key Achievements

Winner — Avinya 2026 Hackathon, C. V. Raman Global University for the Smart Autonomous Wheelchair project.

3rd Place — Webtronics, Silicon Institute of Technology in a competitive web debugging contest.
